WORK EXPERIENCE

Senior Software Engineer

AI-TechSpire

06/2025 - Present

FSD, PK (Onsite)

AI-TechSpire builds scalable SaaS platforms, AI agents, APIs, and cloud systems with senior-first engineering expertise.

Achievements/Tasks

- Strengthen the foundation of LawnProSoftware by improving architecture, code quality, and long-term scalability.
- Build and ship new features daily, enhancing workflows for field-service businesses managing operations on LawnPro.
- Collaborate with project managers, colleagues, and product owners to turn customer needs into intuitive, production-ready solutions.
- Optimize performance and reliability so LawnPro remains a trusted platform for thousands of service providers.

Senior Software Engineer

Shorages

12/2021 - 02/2025

Dubai (Remote)

An E-commerce fulfilment company founded in 2019, providing on-demand warehousing, storage, and delivery for SMEs across the GCC.

Achievements/Tasks

- Built Shorages end-to-end, automating invoicing and integrating Shopify, Woocommerce, Zoho, and Stripe to streamline multi-channel fulfillment.
- Improved system performance by 35% through Laravel backend optimization and MySQL reporting enhancements.
- Launched Lamia, enabling businesses to publish and retrieve product listings seamlessly across e-commerce channels.
- Scaled Lamia to support over 1,300 product types with an in-house ES6 library for managing required and optional fields.
- Reduced manual overhead by implementing asynchronous inventory auto-sync and AI-driven content and image generation for product listings. SKILLS

Full Stack Developer

AllianceTech

06/2021 - 11/2021

LHR, PK (onsite)

Software development company focusing on technology solutions.

Achievements/Tasks

- Build REST APIs in Laravel, Node.js, and Python with reusable components across multiple projects.
- Deploy applications on AWS (EC2, Lambda) and maintain CI/CD pipelines to streamline project delivery.
- Improved development processes through continuous automation and testing.
- Design API contracts with clients to align backend services with mobile development teams.
- Deliver stable, production-ready applications under tight deadlines on diverse projects.

Full Stack Developer

Bothofus

06/2019 - 05/2021

Sweden (Remote)

BothOfUs is a Sweden-based organization fostering peace, youth empowerment, and growth through digital innovation and partnerships.

Achievements/Tasks

- Developed Laravel APIs and Vue.js frontends for e-commerce and mobile applications across multiple projects.
- Built the Plastic Free Europe marketplace with Stripe payments integration and inventory tracking.
- Optimized MySQL queries and implemented PHPUnit tests to ensure stability and reliability.
- Converted Zeplin designs into responsive WordPress and Vue.js sites for production delivery.
